

CIVILIAN ADVANCEMENTS — Four White Sands Missile Range employees were promoted this week to grades GS-15 during ceremonies in the range commander's office. Looking on while Major General H. G. Davisson, WSMR commander, signs their promotion authorizations are: (from left) Fred Sweet, Missile Flight Surveillance; Pat O'Dea, Analysis and Computation Directorate; Richard Kondo, Data Collection Directorate and Tamio Katsura, Analysis and Computation Directorate, Deputy for National Range Operations. Not shown, but also promoted to GS-15 recently, is John Davis, Jr., Instrumentation Development Directorate, Deputy for National Range Engineering. The promotions were the first advances in about five years to the top managerial positions at the national range. (U.S. ARMY PHOTO)

Naval facility's first civilian employe retires

The U. S. Naval Ordnance Missile Test Facility's first employe has retired at White Sands Missile Range after seeing the Desert Navy grow from a series of Quonset huts to an expansive Navy facility doing important research work.

Mrs. Ethel Anderson joined the Desert Navy April 19, 1947, and since that date has played an important part in the growth of the facility's administrative offices and the hiring of other civilian employes.

Mrs. Anderson recalls how things were in the "old days" when the national range was

called White Sands Proving Grounds and USNOMTF was known as the Naval Unit. When the Navy first came to White Sands it consisted of a series of Quonset huts occupied by a commanding officer, executive officer, Mrs. Anderson, several other civilian employes, and a small staff of naval officers and enlisted men.

But as the Navy mission at White Sands increased with the advent of newly developed fleet missiles, so did the personnel and buildings until it has become the permanent unit it is today with modern buildings throughout the post.

WSMR Story is related by film

From a public library in Florida to a penitentiary in New Mexico, White Sands Missile Range is spreading its missile story.

The supersonic roar of missile firings at the national range is being heard throughout the country, via locally-produced motion pictures.

The color films, produced by the range's Pictorial and Processing Division, are loaned free for non-profit showing through the Audio-Visual Support Center.

Each month reels are mailed to civic and educational groups in more than 25 states.

Recently the film library has been updated and new film catalogs published. Presently, about 28 different films are available for loan.

The picture stories have been sent by request to elementary schools, high schools, colleges, libraries, hospitals, penitentiaries and military posts. An average of 40 films per month are mailed from the film library.

Most popular on the request list is the film record of John F. Kennedy's visit to the range in 1963. The story has been told to junior high schools in Pennsylvania, Indiana, Louisiana, and Wisconsin.

"Missile on the March," another popular film, has been sent to civic groups in Nebraska and Michigan.

Other films for loan describe missile firings, radar control, nuclear activities, range history, and student trainee programs. Running times vary from 10 to 30 minutes and free use of screens and projectors are available for local borrowers.

Director of the audio-visual center, William Pennock, suggests that groups interested in borrowing motion pictures address requests for film catalogs to: Commanding General, ATTN: STEWS-NR-DK, White Sands Missile Range, N. M., 88002.

The center's present distribution record began 13 years ago when the film library was established and sent out its first movie story.

As the first employee at the facility, Mrs. Anderson handled the majority of administrative responsibilities and until her retirement, assisted and advised the Industrial Relations Officer.

Throughout Mrs. Anderson's long and rewarding career at the Naval Facility she has received numerous commendations in recognition of her superlative professionalism in an administrative capacity. She made the initial steps to set up the Civilian Personnel and Payroll Offices and supervised both to insure their smooth operation hiring employees as needs required.

She received special recognition for the quantity of work without the sacrifice of quality. A report from an administrative inspection crew stated that Mrs. Ethel Anderson worked far beyond normal expectation or requirements while maintaining a highest degree of accuracy and neatness. The orderliness Mrs. Anderson has maintained in filing and records have been instrumental in the Naval Facility's high marks during these inspections.

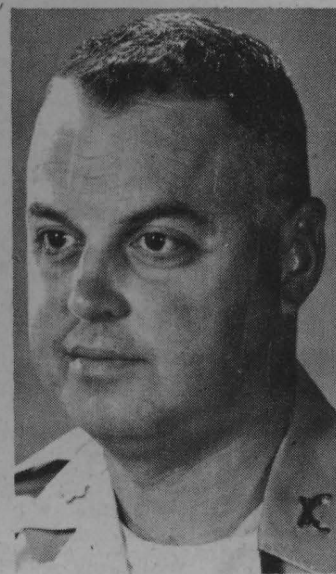

She has also received many letters of appreciation for her outstanding contribution to minority groups and disabled groups in the area. In 1962, the Naval Facility was presented a plaque by the governor of New Mexico for the employment of the handicapped. This award would not have been possible without the ambitious efforts of Mrs. Ethel Anderson.

In addition to her regular duties in Industrial Relations, Mrs. Anderson also performs duties in the Safety Program Work assisting in the handling of the Bureau of Employees' Compensation and Industrial Health Program. With her versatile knowledge in this field, she has done much to promote the security of

(Continued on Page 4)

The month of June was quite dry and the final ten days of the month were rather warm, according to Paul H. Taft, meteorologist, Atmospheric Sciences Office, USA Electronics Command, White Sands Missile Range.

Rainfall was about two-thirds of the normal, however, the

MAJOR VINCENT B. COTE

New Provost Marshal is named here

Army Major Vincent B. Cote has been named to the post of Provost Marshal at White Sands Missile Range. He succeeds Lieutenant Colonel Clarke L. Shumaker Jr., who has been transferred to Ft. Sam Houston, Tex.

Major Cote, a 41-year-old reserve officer, arrived at the range June 28 from duty in Saigon, Republic of Vietnam. He served there as security officer with the 3rd Ordnance Battalion (AMMO) and later as chief of physical security with the 1st Logistical Command during the past year.

The new provost marshal has nearly 20 years active duty to his credit, including about 18 months as an enlisted man. He was commissioned a second lieutenant in the Military Police

Enlisted promotion system due for sweeping changes

Dry, warm June noted at Range

number of thunderstorms was average. Only three of the storms produced measurable rainfall, Mr. Taft added.

The average temperature for the sixth month was nearly normal. The daily average went from eight degrees below average on June 10, to 10 degrees above on the 27th, Mr. Taft said the mean maximum temperature for the month was 94 degrees, 1.1 degrees above the 19-year average. The average minimum temperature was 67.5 degrees. That was 1.7 degrees below the mean.

The cloud coverage was below normal. The absence of clouds made the days hotter and the nights cooler.

Mr. Taft said the temperature reached 100 degrees or more on six days during the month. That number was twice the average. Two new high temperatures records were established, one on June 12 with 98 degrees, and the other on the 21st with 105 degrees.

June's total rainfall was 0.58 inch. That was 0.32 inch below the norm. Mr. Taft asserted, that the total rainfall so far this year is 3.26 inches, 0.21 inch greater than the 19-year mean.

On June 10 and 11, the lowest temperatures were recorded at 41 degrees.

The highest temperature recorded were 107 degrees, at the National Monument, and

BULLETIN

Chief Warrant Officer Raymond J. Baker, 50, National Range Operations, died Thursday at McAfee Army Hospital after an apparent heart attack.

A veteran soldier of nearly 30 years, CWO Baker had served at the range for a year. He planned to retire from military service this month.

His widow, Ruth Fitzgerald Baker, resides at 213 Toolee, WSMR.

Funeral services are pending.

Toastmistresses leave Saturday for convention

Five toastmistresses, all employes at White Sands Missile Range, are packing their bags for the International Toastmistress Convention in Calgary, Alberta, Canada.

Boarding a commercial airliner Saturday will be: Mrs. Grace Hamlin, Miss Gladys Frost, National Range Operations; Miss Juana Serna, Mrs. Edith Rohan, Atmospheric Sciences Office; and Mrs. Lucy Badeau, Electronic Research and Development Support Activity.

The group will be honored at a champagne luncheon given by the airlines in Denver, Colorado, en route to the convention. Then the delegates will fly to Canada for the annual meeting, lasting from July 14 to 18.

Delegates from Tejas Toastmistress Club in El Paso and Mrs. Hamlin, Four-Corners regional supervisor elect, and Miss Frost.

Representing the WSMR Desierto Club are Mrs. Badeau, regional speech contest winner; Mrs. Rohan, Council Five chairman; and Miss Serna, alternate delegate and incoming Council Five treasurer.

AER FUND DRIVE — Major General H. G. Davisson, commanding general of White Sands Missile Range, signs a check for his personal contribution to the Army Emergency Relief drive now at the half-way point. Major Robert D. Doleman, executive officer of Troop Command and fund drive chairman looks on. The AER drive was started on post June 17 and will continue through Aug. 1 according to Major Doleman. While no dollar goal has been established in the annual Army-wide drive, Major Doleman is striving to reach 100 per cent participation at the range. (U.S. ARMY PHOTO)

Post AER drive ends August 1

In the time of an emergency, a soldier, active or retired, can always turn to the Army Emergency Relief (AER) for financial help to get through a crisis.

The AER campaign is in its fourth week at White Sands Missile Range. According to AER operating officials, contributions are running below expectations.

"The drive will close August 1, and time to donate is running out. In order to operate effectively, the AER needs everyone's support," stated

2LT William E. Hammond, Headquarters Company, commanding officer. He continued, "Last year's drive amounted to about \$1,000, while AER loans exceeded that amount by a large margin."

All active or retired military personnel and their dependents are eligible for a loan from AER. Loans are paid back interest free and in some cases, if repayment would be a hardship, it can be changed to an outright grant.

"By contributing to the AER,

(Continued on Page 4)

Sweeping changes in the enlisted promotion system for hikes to E-5 and higher will go into effect August 1, Army officials announced this week. New Army-wide regulations on the operation of the promotion system will provide that:

Standardized scoring rules will be used for award of promotion points for administrative qualifications (time in grade and similar factors) and by unit promotion boards.

Every soldier who fails to be recommended by the unit promotion board will be told, in detail, why he didn't make it.

Soldiers with recommended list status won't "insofar as possible," be transferred into blind-alley assignments at stations that have no slot in the MOS and grade for which they were recommended.

Exact, Army-wide rules will govern the placement of names of newly assigned men on the local recommended list.

Tighter controls will apply to creation, approval or disapproval, and additions to each command's recommended list.

In the past, promotion policies have been generally standard throughout the Army but procedures have varied widely from one command to another. However, the new rules standardize the relative "weight" given to each of the qualifying factors so the individual will know what his strong or weak areas are, regardless of where he is currently assigned.

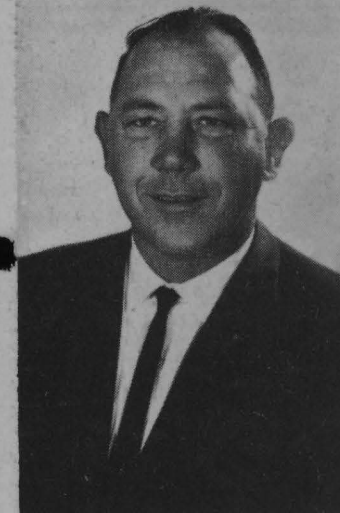

Under the new setup, a total of 1000 points is possible — 800 based on administrative qualifications and 200 based on the consideration by a promotion board.

Commanders' appraisals enter the scoring picture twice, as part of the enlisted evaluation score each man receives annually, and with a specially scored, up-to-date efficiency report forwarded to the board on each man considered.

The new regulation provides that whenever a recommendation for promotion is disapproved within the chain of command, the specific reason must be explained to the soldier.

Administrative qualifications, worth 800 points, will be computed on a standard form, certified by the personnel officer, and each soldier will have a chance to verify the accuracy of the score. Active federal service, time in grade and mili-

B. R. GANTZ

ROB R. TILLET

ALEXANDER S. PACZYNSKI

DUANE L. DUSTON

NASA employes reassigned

Four missilemen at the NASA Manned Spacecraft Center White Sands Test Facility have been reassigned to chief positions at White Sands and Apollo site facilities.

Reassignments of Las Cruces B. R. Gantz, Rob R. Tillett, Alexander S. Paczynski, and Duane L. Duston were announced recently by M. L. Raines, manager of the White Sands Test Facility.

A mathematician, Gantz, who has been chief of the Propulsion Engineering Office, will be as-

sistant manager at White Sands. Before joining NASA, Gantz was on the Technical Staff of Hughes Aircraft Company and responsible for infra-red and radar missile development at Holloman Air Force Base. He joined NASA in 1961 at Cape Kennedy as instrumentation design engineer and in 1963 transferred to White Sands Test Facility.

Replacing Gantz is Tillett, who has been Propulsion Engineering Office chief at White Sands. Tillett received a

physics degree from the University of Wyoming, and before going to NASA, he worked with General Dynamics Astronautics in San Diego and Thiokol Chemical Company.

Moving into Tillett's past post as Chief, WSMR Propulsion Engineering Office, is Paczynski, an electronic engineer from Niagara Falls, New York. He has been chief of the Energy and Control Systems Branch at the Propulsion Engineering Office.

Paczynski has worked with

Bell Aircraft Corporation of Buffalo, New York; Douglas Aircraft Corporation; and Martin Marietta Corporation in Denver, Colorado.

A graduate from the University of Idaho, Duane Duston will be chief of the Energy and Control Systems Branch, replacing Paczynski. Duston was previously the branch's assistant chief. Before joining NASA, he served four years with the United States Air Force.

TOASTMISTRESS TREAT — Checking their itinerary for a trip to Calgary, Alberta, Canada, for the International Toastmistress Convention are area representatives (left to right) Mrs. Grace Hamlin, Mrs. Lucy Badeau, Miss Gladys Frost, Miss Juana Serna, and Mrs. Edith Rohan. The group will leave Saturday afternoon for the annual convention next week. (U.S. ARMY PHOTO)

A little too warm

There you sit - it's 95 in the shade, the motor is overheating, you're 20 minutes late for dinner and the gas gauge is getting close to empty. You've been sitting there for 10 minutes trying to get into the line of traffic or make a turn, or get across the intersection. But no luck - the cars keep coming. It looks like some of them even speed up a little when they see you waiting there and you're sure a few of the drivers grin sadistically at you as they whiz by, leaving you sitting there.

Then suddenly a driver slows down, giving you the nod to go ahead; one driver out of all those - how many hundred who refused to give you a break - with some manners.

What happens to all the nice guys who play baseball with their kids and send flowers to their wives? Don't they drive automobiles? And what about the nice little gray-haired ladies that like cats and give cookies to all the neighborhood kids - don't they drive?

Sure they do - you just don't recognize them anymore. As soon as these otherwise nice people get behind the wheel of their "Supersonic 86's" their personalities change to a combination of Mr. Hyde and Ho Chi Minh.

They forget all about common courtesy and good manners and revert to the primitive outlook of survival of the fittest.

It makes little difference to them that by showing a little courtesy and consideration for other drivers on the road, they would help make driving - even during rush hours - more enjoyable for everyone. They fail to realize that slowing down to let one or two cars feed into a line of traffic isn't going to cost them more than five or ten seconds.

They also don't stop to think that they might be the ones waiting to get into traffic the next time. Then they would appreciate a little consideration by other drivers.

But, it's a vicious circle. The rude, ill-mannered drivers have had their way so long that courtesy on the road is almost a thing of the past.

Maybe it's about time we reversed the trend. Courtesy and consideration certainly aren't going to cost you any money; the extra few seconds it takes to give another driver a break won't make any difference in your time schedule; and it will surely be easier on your temper, nerves and the fenders on your car. (AFPS)

Everyone's job

"Cost Reduction in the military? You're talking to the wrong guy. - I'm just trying to do my job. The people who can do something about cost reduction are the big wheels back in D. C. and the ones up in headquarters. You don't really expect me to save a million dollars a year doing my job, or even close to it."

That's a pretty familiar statement because most of us in the military do think of Cost Reduction as a pretty high-level, multi-million dollar program. Since we're not up in the planning elements of various research and operating programs, we figure we're not really concerned with Cost Reduction.

Sorry about that buddy, but that's not right. Although it's true most of us don't come up with an idea or program that will save four or five million dollars, most of us can be very effective in saving small amount that over the long haul can add up to a pretty large piece of change.

How? Where? Right in your own office, division or squadron. You can do it by making sure that neither time nor materials are wasted by anyone. You can do it by making sure you, or the people that work for you, do the job correctly the first time.

You can do it by submitting ideas for better ways of doing things through the Suggestion Program and Cost Reduction Program channels instead of just sitting around griping about how "there must be a better way to do this."

Cost Reduction isn't restricted to the upper echelons. It's everyone's job - enlisted, NCO or petty officer, commissioned officer or civilian employee. If every man and woman in uniform and every civilian employee saved 5¢ a day by effective utilization of time and material, came up with a better way of doing their job or developed an idea for equipment modification and improvement, think what a huge savings this would be at the end of the year.

This savings could then be directed toward improved facilities, equipment and operations and everyone would benefit. You are the right guy to talk to about Cost Reduction. You can do it and in the long run, you will benefit. (AFPS)

Fight it off

Common colds bug you? Advice from the Health Insurance Institution is: Try getting physical with it.

Drown it.
Sweat it out.
Sleep it to death.
Cool it.

Chances are, the Institute says, if you catch a cold early you can fight it off - hopefully overnight.

The Institute cited data supplied by the Life Extension Foundation which recommended:

At the first sign of a cold go directly to bed with one or two aspirins and a hot lemonade.

Most important: "drink you must - water, fruit juices, tea - almost anything, so long as you drink."

The advice continues:

If your cold has already started, more drastic measures are prescribed. Such as:

First, take a hot bath. Follow with a hot drink to induce perspiration. Then go to bed.

If you are accustomed to whiskey, there is no harm in putting a couple of tablespoons in the lemonade. It will assist the perspiration process.

Next, bundle well by using extra blankets. To further aid your sweating, you might wear a sweater over your night clothes. Wool socks may also help.

If your throat is sore, a hot salt gargle is recommended. The advice continues:

Be sure to stay in bed at least 10 hours.

When you get up in the morning, a cool shower may be taken.

Such a regime may break up a cold within the first 24 hours.

The foundation also recommends that the average person "toughen" himself against the onset of a cold by "exercise, fresh air and cool water baths."

FRIDAY

HOW SWEET IT IS! (M). Award winning magazine photographer Grif Henderson (James Garner) and wife Jenny (Debbie Reynolds) are off to Europe escorting a group of young girls on a tour. There are impossible and hilarious situations as they tour France and Italy. The first motion picture to tell the entire freaked-out, mind-blown, turned off, switched-on world... just exactly HOW SWEET IT IS!

SATURDAY MATINEE

BATMAN (F). The wide screen is filled with Batphrenia, Batstrategy and Batomnipotence as the Dynamic Duo conduct a full scale war on crime designed to undermine the safety of world peace. The United Underworld, founded by the Penguin (Burgess Meredith), the Joker (Cesar Romero), the Riddler (Frank Gorshin) and the Catwoman (Lee Meriweather), the world's most monstrous villains, have now pooled their evil resources to outwit Batman and to capture and control the entire globe. With a fight to the finish which rages from the floor of the Security Council of the United World Organization to the depths of the Penguin's war-surplus submarine, Batman and Robin manage to conquer all, at least until the next time.

SATURDAY EVENING

THE GREATEST STORY EVER TOLD (F). The birth of Jesus Christ is forecast by ancient prophecy, and despite the efforts of King Herod (Jose Ferrer) to prevent his presence by having all male babies executed, he is born to Mary (Dorothy McGuire) and Joseph (Robert Loggia). Time passes and Jesus (Max Von Sydow) gathers his followers and the word spreads that he is the son of God. Many disbelievers become believers as they witness the wonders of his faith and his powers. The holders of power see him only as a threat that must be destroyed. When David McCallum (Judas Iscariot) turns him over to the priests and Romans, he is sentenced to die by crucifixion. A divided populace can not voice enough protest to save him. After burial, he does arise again with a message of hope for the world.

SUNDAY & MONDAY

A DANDY IN ASPIC (M). Espionage thriller filmed on location in London and Berlin. A double agent ordered to kill himself... He had his orders - find the Dandy and kill him. See the excitement that shatters the Berlin Wall.

TUESDAY

IN THE HEAT OF THE NIGHT (M). A homicide expert (Sidney Poitier) from the Philadelphia police force on a visit to a small town in Mississippi is called upon by the local chief of police (portrayed by Rod Steiger in his Academy Award winning role-Best Actor) to help him solve a murder. Before the perpetrator of the dead is unmasked, suspicion is thrown on several persons from Poitier, to a town ruffian and even one of the men on the staff of the chief.

WEDNESDAY

THE LAST ADVENTURE (M-Y). An exciting drama about a lost shipment of diamonds which was shipped from the Congo to Paris. En route the plane is downed and the expedition looking for the downed plane takes you through France, North Africa and the Congo.

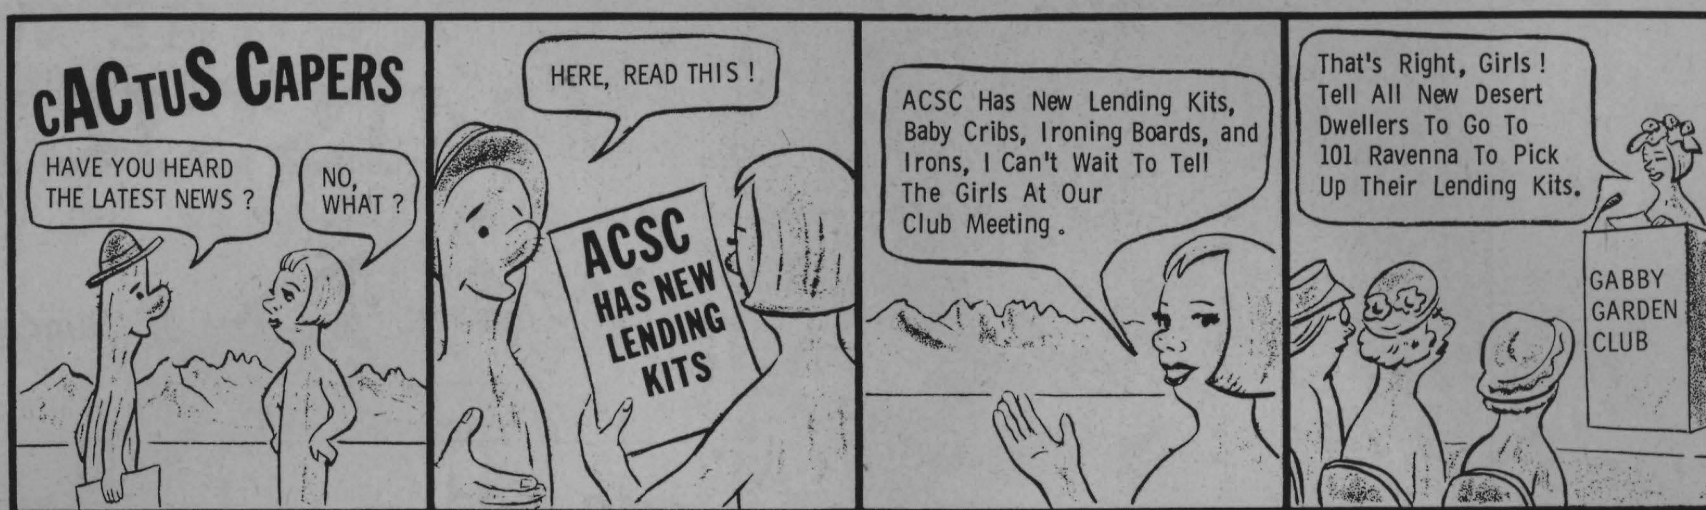

THURSDAY & FRIDAY

THE THOMAS CROWN AFFAIR (M). The story is a fictional account of a \$2,500,000 local bank robbery which is uncomfortably true to life. Boston... this is where the story begins... Thomas Crown (Steve McQueen) is a wealthy Boston sportsman and millionaire playboy who takes to planning and executing crimes for kicks and fame. Dunnaway portrays the cool insurance investigator who tries to solve the baffling bank robberies.

"Speak softly and only those closest to you will ever know how little you know."

Before leaving work, make sure your office or building is secure.

Post ACS offers help to families

"Seeing the world" may sound adventuresome, but for military it means unique problems, too.

The occasional dismay of transit families at White Sands Missile Range, as well as other Army posts, is how to survive the frenzy of moving.

Word arrives that a truck strike has delayed the moving van for two weeks. The newly-assigned house is empty of food, dishware, or bedding. Problems seem to be mushrooming.

This is the time for the missile range's official helping hand - Army Community Service (ACS).

The program is not just for people in the moving process. ACS is prepared to help anytime. Its purpose is to help the Army Community meet personal and family problems. Both active and retired military are eligible for ACS services.

Army Community Service is an information clearing house. It directs problems to the military or civilian agencies that can best handle them.

The service program, operating at WSMR since 1965, is in progress at all major Army installations in the United States, Canal Zone, Europe, Okinawa, and Japan.

The most popular ACS service is the lending closet, quartered at the Army Community Service Center, 101 Ravenna Road.

An array of household goods, from baby cribs to carpet peelers, are available for loan. Hospitality kits, complete with pans, silverware, coffee pots, and table settings, are loaned frequently to post newcomers.

If an unexpected emergency disrupts a family, ACS helps find child care, transportation, and shopping assistance.

Other ACS services are family and financial counseling. Trained workers provide guidance in budgeting problems and also channel legal and marital troubles to professional agencies.

Even "geographic widows," whose husbands are on overseas duty, can find a niche at ACS Center. The service provides names of other "waiting" wives having mutual interests and problems.

The Center also maintains a current library of information about other Army posts (living quarters, shipping facilities, schools, climate, etc.) for departees who have been reassigned.

Even after the moving flurry fades, military families can

PMOC - The monthly Break-fast-meeting of the Protestant Men of the Chapel will be held Thursday, July 18 in the Activity Room of the Post Chapel at 6:30 a.m. All men are invited to attend. Enjoy a free breakfast and the interesting program that has been prepared for this gathering.

Short tour EM eligible for early release

U. S. Army enlisted men returning from a short tour area now are eligible to be released from active duty up to 150 days prior to completion of their normal terms of service. Previously, the maximum early release time was 90 days.

In announcing the change, which became effective July 1, the Department of the Army said the new policy is aimed at reducing the turnover rate of individuals assigned to units in the United States.

Most soldiers who return from short tour areas for release from active duty are with their units in the United States too short a period of time prior to separation to justify their retention on active duty.

Enlisted personnel in a hostile fire zone may voluntarily extend their tour in an overseas command to qualify for the 150-day early separation. This would permit the Vietnam veteran to be released as soon as he completes the extension of his Vietnam tour.

In short tour areas, except for hostile fire zones, an enlisted man whose tour expires 151 to 180 days prior to his completion of service will be retained in the overseas command until he has less than five months remaining for completion of service.

He will then be returned to the United States for early separation rather than being assigned to a unit in the States for the short period of time remaining. This policy will not affect those personnel intending to reenlist. (ANF)

call on ACS workers for major problem-solving or mere advice.

The theme of WSMR's Army Community Service, telephone 678-3933, is summed up by a shiny sign in front of the Center, which reads "Self-Help, Service, Stability."

SKATING PARTY - WSMR Dependents - There's not much time left to make preparations for the Skat-O-Rama to be held on the Chapel Parking Lot, Sunday, July 14 at 5:30 p.m. We shall appreciate your calling the Chapel Office, 678-3537 or 2615, and telling us the number attending from your family, then we'll know how large to make the order for hamburgers, beverages and snow cones that will be prepared for the skaters (free). Each skater will supply his own skates. If you have not already obtained skates, they are available at the Round-up for a reasonable price.

THE POTLUCK SUPPER for adults will be held Sunday evening July 14. Families are requested to bring a dessert or salad to supplement food (meat, rolls & butter, beverages) furnished by the chapel. Please call the Chapel Office, 678-3537 or 2615, and give the number attending from your family. Both the Skate-o-Rama and the Potluck sponsored the Chapel, are for WSMR Personnel of all faiths.

YOU ARE NEEDED to help in the 1968 Vacation Bible School that will be held July 29 through August 9. The School will convene daily at 8:30 a.m. and dismiss at 11 a.m., Monday through Saturday. Call the Chaplain's Office if you can assist us. Phone 678-3537 or 2725.

LOS CABRERA

THEY FLY THROUGH THE AIR - The fabulous Los Cabrera, Mexico's number one acrobatic act, is scheduled to perform at the Post Theater, Tuesday at 7:15 p.m. This will be a return engagement to White Sands Missile Range for the family of five acrobats. The group has performed all over Mexico as well as the United States and Canada. They recently appeared at the Flamingo Hotel in Las Vegas, Nev. Also on stage will be Gwinn and Greg (Nelson), the dynamic duo from Albuquerque. These brothers provide excitement in sound, and sing their own versions of such hit songs as "Cabaret" and "Spanish Eyes." Admission is free and the regularly scheduled movie will follow the special show. (Photo by Plata)

Lucky Strikes take EM lead

A 4-0 sweep by the Lucky Strikes over the Alley Cats at the Roadrunner Lanes Tuesday night enabled the Strikes to take over the lead of the Entitled Men's Summer Bowling League. Lucky Striker Kenny Mishina rolled 204-541, while Ray Leonard clawed a 179-453 for the Cats.

The Left Outs knocked Ace's All Stars out of first place as they trounced the Stars, 4-0. Leading the Left Outs were Will Edwards, 292-504, and John Rowley, 182-512. Tito Gutierrez's 180-506 paced the All Stars.

Juan Lazo, 196-508, Bert Torres, 202, and Bob Salazar, 202, helped Los Indios move into second place by taking three games to one from the last place Booze Hounds, Bark-

ing loudly for the Hounds was Paul Bugbee, 188-516.

Three games to one was the verdict as the Nationals beat the Pill Rollers. Pat Sweeney was high for the Nationals with 194-534, and Bill Richardson led the Rollers with a 206-532 evening.

The Stars and Stripes clashed with the 4 Aces and won three games to one. Unfurling for the Stars and Stripes were Tom Smith with a 186-487 score. High Ace was Paul Glick, 180-451.

Taking a look at last week's action, the Pill Rollers split with the Alley Cats, 2-2. Don Swope, 199, and Carl Bakarich, 511, led the Rollers. Rich Bartlett was top Cat with 178-514.

The Left Outs and the Booze Hounds split two games apiece. Leading the Left Outs was Fred Pounds, 504, and Will Edwards, 185. For the Hounds, it was C. B. Smith, 198-486, and Paul Bugbee, 489.

Bert Torres, 197-535, and Juan Lazo, 197-518, led the Los Indios to a 3-1 victory over the Stars and Stripes. Tom Smith, 185, and Paul McManus, 463, were tops for the S & S.

The 4 Aces met Ace's All Stars and took three games to one from them. Starring for Ace's was Manny Medeiros, 194-555, while the Fourth Ace was Paul Glick, 208-575.

The Nationals and the Lucky Strikes deadlocked two games each. Pacing the Nats were Jesse Branham, 186-485, and Gary Zorn, 187. John Cwik was high for the Lucky Strikes with 201-537.

Standings as of July 9:

TEAM	WON	LOST
Lucky Strikes	29	15
Los Indios	27	17
Ace's All Stars	26	18
The 4 Aces	25	19
The Nationals	23	21
The Left Outs	22	22
Stars and Stripes	21	23
The Alley Cats	17	27
Pill Rollers	16	28
Booze Hounds	14	30

Little League standings

Two teams are deadlocked for first place in the White Sands Missile Range Little League as of Monday night. The Hawks and the Darts are fighting it out for the top position while the Tigers are a growing one game behind.

The standings as of Monday, July 8:

TEAM	WON	LOST	MANAGER
Hawks	7	3	CPT Lattimer
Darts	7	3	SP5 Copeland
Tigers	6	2	PFC Higgins
Nike X	6	4	LT Duignan
Sharks	5	5	FTM3 Vetter
Sox	4	5	SGT Bozzelli
Medics	2	6	CPT Dent
Jets	1	8	SP6 Hall

Hot teams tabbed by computer

By BUD GOODE
There's an old baseball wives' tale that says the team in the lead on July 4th is the potential pennant winner at season's end. But you don't have to wait for firecracker day to pick the hot teams this year. They are St. Louis and Detroit, the two teams tabbed by Computer Corner on opening day.

The top and bottom teams in both leagues are fairly well established - but how can you tell which of the other teams will end up in the first - or second - division?

The one best statistic which measures total team offensive-defensive ability, is the ratio of runs to opponent runs. By simply dividing your favorite team's total runs by the number of runs allowed you get a ratio figure which shows how they compare with the other teams in the league. At the end of ten seasons this figure is 100 per cent accurate in accounting for a team's standing.

To measure total team strength for '68, Computer Corner poured the season statistics into our University Computing electronic evaluator (through games of June 11) with the following results:

NATIONAL LEAGUE	RATIO
ST. LOUIS	1.31
NEW YORK	1.14
CINCINNATI	1.05
SAN FRANCISCO	1.02
PITTSBURGH	1.02
PHILADELPHIA	1.00
LOS ANGELES	.99
ATLANTA	.87
CHICAGO	.85
HOUSTON	.85
AMERICAN LEAGUE	R/OR
DETROIT	1.40
CLEVELAND	1.32
BAITIMORE	1.23
MINNESOTA	1.04
OAKLAND	1.03
CHICAGO	.91
BOSTON	.90
NEW YORK	.88
CALIFORNIA	.77
WASHINGTON	.76

To win either league takes a ratio of R/OR of 1.20. Detroit and St. Louis are well ahead with 1.40 and 1.31 - meaning they are 40 per cent and 31 per cent stronger than the average team in their league. The average team, which will finish in 5th or 6th, will have a ratio of R/OR of 1.00 - they will score as many runs as they give up.

The weakest teams - Houston and Washington - will finish with .75 R/OR ratio figures - implying they are about 25 per cent weaker than the average team in the leagues.

Surprises? Yes - Pittsburgh, trailing in the standings, shows a 1.02 total strength ratio. The Pirates should not, therefore, finish in the cellar.

And the New York Mets and Oakland Athletics, pitching phenomena of the year, need only a few more hits to finish in the first division.

Frank Pace, Jr. heads AUSA

Former Secretary of the Army Frank Pace Jr. has been elected to a one-year term as president of the 100,000-member Association of the U.S. Army (AUSA).

Pace, who lives in Greenwich, Conn., is a lawyer and president of the International Executive Corp. of New York. He was Army secretary from 1950 to 1953.

Pace succeeds Elvis J. Stahr, who has been elected to a three-year term on the AUSA Council of Trustees. Stahr, president of Indiana University, was secretary of the Army from 1961 to 1962. (ANF)

Range Rockets blast Bliss, San Elizario

The WSMR Rockets blasted off last week by defeating San Elizario, 6-3, and ATC of Ft. Bliss 2-0.

The Rockets outplayed the second place San Elizario team in the El Paso Lower Valley League Sunday afternoon to mark a seven win and five loss season standard. They are now in the middle of the team standings in that league.

The San Elizario's infield was baffled by a Rocket barrage of singles hit at Goddard Field. Wally Hedberg, Dennis Pluchinsky, Joseph Rudolph and Clyde Kastler rapped two each.

The Rockets launched their offensive attack in the first three innings scoring five runs

before San Elizario could even get their bats off their shoulders. In the seventh inning WSMR tallied one more run to walk off the field the victors of a 6-3 ballgame.

Pitching for the Rockets was Wayne Conroy, striking out 16 and giving up only six hits.

Going into Monday night's game at Carpenter Field, Fort Bliss, ATC, were the undefeated champions of the Ft. Bliss League. Although they still remain in first place, they are no longer invulnerable after suffering a 2-0 upset from the WSMR Rockets.

Fielding blunders by ATC cost them the game as WSMR's two runs were scored on

errors. Hedberg doubled, advanced to third on an error, and came home on a passed ball. Fukushima reached first base on an error, was driven around to third on a Pluchinsky hit, and scored on a passed ball.

Dale Driskel was the winning pitcher hurling a five-hit shut-out.

The Rockets will host an exhibition game against the El Paso Lower Valley League leading La Union at Goddard Field Thursday night.

Tennis tourney finale scheduled

The Doubles Tennis Tournament will be going into its final stage following a semi-final playoff between Carl Wesemann-Tony Munoz and David Avery-John Campbell. The winners will compete against the finalists George Silvas and Stanley Givetz for the title.

Weldon Byers and Mark Keller were eliminated in the first round, forfeiting to Kenneth Griffin and William Shurter. George Silvas and Stanley Givetz also took a forfeit win over Mike Gordon and Joe Vincent. Other first round action showed Wesemann and Munoz defeating Bill McBurney and Mark Keller 7-5 and 6-4, David Avery and John Campbell drew a bye.

The Silvas-Givetz combination went into the semi-finals against Griffin and Shurter and came out with a 6-2 and 6-3 triumph putting them only one game away from the championship. They will play the deciding match with the winners of the Avery-Campbell and Wesemann-Munoz bout.

Klee, Jones take Range golf titles

A highlight in the WSMR golfing program, the concurrently run General Cone Memorial and Post Championship tournaments, concluded play on July 7. Winner of the General Cone Memorial handicap tournament was Hugo L. Klee with a low net of 295 for the 72-hole contest.

Dearl F. Jones earned the first place trophy for the Post Championship by defeating Kermit Baker in a sudden death play-off. Both players scored 311 in the scratch medalist tournament.

Prizes were also awarded the putters and dubbers. Jerry D. Handegan stroked the least putts with 27 while, on the opposite side of the green, Peter Davisson made the most putting attempts with 43.

J. J. Clark was kept busy throughout the tournament marking the number of strokes on his scorecard. After wearing down several pencils, the final calculation was 346 strokes. All was not lost (except the tournament) however, as he received a consolation prize for his slightly less than spectacular performance.

Your lawn represents you, take care of it.

UP THE LADDER — Larry W. Gray of the U.S. Naval Ordnance Missile Test Facility has been promoted from Chief Gunner's Mate to Warrant Officer at White Sands Missile Range. Here his wife, Sandra, and LT L. J. Wilkey attach the new rank insignia. Warrant Officer Gray arrived at the national range during July 1966 after successful completion of a three-month Terrier and Tartar Handling school at Damneck, Va. He has also completed the Guided Missile System Mark 11 school at Great Lakes, Ill. WO1 Gray served aboard the USS Charles F. Adams (DDG-2) and the USS Yellowstone (AD-27) and has received orders to the USS Topeka (CLG-8) which will soon end his tour of duty at the range. He and his wife have four children, Cheri, 8; Jeff, 4; Scott, 3; and Terry, 2.

New Provost

USNOMTF employees in safeguarding their health and assuring them of proper and prompt handling of emergency cases.

Her retirement at USNOMTF marks not only the termination of 21 years of efficient service at White Sands Missile Range but also 26 years of overall government service. Prior to her arrival at the Naval Unit, she worked with draft boards, Selective Service, Poor Food Administration and other government institutions in the Southwest.

A party in the Conference Room at Naval Headquarters marked Mrs. Anderson's retirement. Commander D. L. Stephenson, executive officer of USNOMTF, presented Mrs. Anderson a "Desert Rat Certificate" in appreciation for her long tenure of service with the Navy. She then stepped up to an elaborate stainless steel punch-bowl resembling a miniature Roman fountain to receive the first cup of orange sherbet punch.

A large number of civilian employees gathered in the Conference Room to extend their best wishes.

After everyone returned to their seats, Mrs. Anderson opened up the "going away" gifts presented by fellow employees. They included a set of luggage since her retirement plans include a good deal of traveling. Encouraged by anxious viewers to open the luggage after it was taken from the wrapping, Mrs. Anderson found an attractive yellow gown folded neatly on the bottom.

Dry, warm

Permit voting at 18 proposed by President

In his proposal to permit voting at the age of 18, President Johnson noted, "The young men of today serve their Nation in uniform with the same devotion as their fathers and brothers of earlier days showed."

He said, "I deeply believe that America can only prosper from the infusion of youthful energy, initiative, vigor and intelligence into our political processes."

The President proposed that Congress approve and submit for ratification of the legislatures of three-fourths of the States an amendment to the Constitution of the United States to provide, as follows:

"The right of any citizen of the United States to vote shall not be denied or abridged by the United States or by any State on account of age if a citizen is eighteen years of age or older."

The State of Georgia since 1943, and the State of Kentucky, since 1955, have permitted 18-year-old residents to vote.

The two new States of Alaska and Hawaii have permitted 19 and 20 year old residents, respectively, to vote.

In his proposal, President Johnson stated, "Throughout our history as a young Nation, young people have been called upon by the age of 18 to shoulder family responsibilities and civic duties identical with their elders."

"At the age of 18, young Americans are called upon to bear arms..."

"The age of 18, far more than the age of 21, has been and is the age of maturity in America — and never more than now."

The President pointed out, "The young people of America in this decade are far more ready, far better qualified, far more able to discharge the highest duty of citizenship than any generations in the past."

The first proposal for a Constitutional amendment in the voting age was advanced in 1942 by Senator Arthur Vandenberg.

President Eisenhower, in his 1954 State of the Union Address, urged an Amendment to lower the voting age to 18.

In the 90th Congress, more than 50 proposed Constitutional Amendments to extend voting rights to 18 year old citizens have been introduced.

President Johnson affirmed, "The concept has been tried and tested. Its merit has been established. Its rightness is now beyond dispute." (AFPS)

Rocket fuel additive found

U.S. Army scientists here have discovered new solid propellant additives that have opened the way to major improvements in certain Army missile systems.

The discovery, considered a major breakthrough in solid rocket propulsion technology, was the result of research and development conducted in the Army Missile Command's Research and Development Directorate.

The new class of additives can increase the burning rate of solid rocket propellants by at least three times the present rate. This will permit the development of rocket motors with shorter burning times and higher thrust. With the additives, rocket propellants will provide higher velocity without increase in weight. (ANF)

There are about 4,500 Bud-dhists in New York City.

Get a cold bug.

EXPLORERS EXPLORING — Members of WSMR's Explorer Post 74 take time out from their busy schedule at the Philmont Scout Ranch and Explorer Base in northern New Mexico, to have their picture taken. Members of the expedition are, front row, left to right, Joel Johnson, Mike Macbeth, Bob Frank, Major Charles E. Macbeth, Tom Schamp (Philmont Ranger), Mike Kelly. Standing are, Paul Fischer, Bill Bowen, Kevin Cox, Erick Davis, John Yepsen, Bob

Holder, Kent Trede, Bill Anderson, Frank Robinson, Jim Luke and Glen Beall. During the 12-day trip, the group participated in such programs as field biology, archeology, mountain climbing, western lore and paleontology. One of the highlights of the trip was an overnight stay at the 9,200 foot Miranda trail camp, located in a forest of tall Aspen trees. The boys returned to White Sands Missile Range Sunday.

Promotion System due changes

(Continued from Page 1)

tary education are each worth 100 points. The evaluation score is worth 150, the efficiency report counts 250, civilian education counts 75 and physical fitness is worth 25 points.

The promotion board can award up to 200 points, based on such factors, as personal appearance, manner, general military knowledge and the individual's efforts for self-improvement.

When a soldier on a promotion list is alerted for reassignment, his commander will immediately notify the Pentagon that he is being carried on the current promotion list. The Pentagon will then check the man's orders and find out whether there are slots in his MOS at the higher grade within the gaining command. If not, officials will try to find a different assignment for him.

A soldier normally will not depart from his duty station under these circumstances until his assignment instructions have been confirmed or changed by the Pentagon.

When men on a recommended list move to a new command, the usual rule will be to place them on the gaining command's recommended list in the order of merit indicated by the soldiers' point scores. If a new man has the same score as someone else on the list, the order of merit will be decided by: the longer period of recommended status, then by date of rank, then by Basic Active Service Date, then by age.

A newly assigned soldier won't be integrated immediately, however, if his point score is lower than the scores of other men in the command who (with the same MOS and grade) didn't get on the recommended list. In this case, the soldier will be reevaluated at the next scheduled board to either get on the list or lose his recommended status.

If, upon reevaluation, the individual's new score is above that of other individuals who appeared before the board, but his is not selected because of lack of position vacancies, he nevertheless will be immediately integrated into the command's recommended list.

Old soldiers who meet the minimum qualifications for promotion and have been recommended by their commander may appear before a board — but tighter controls are being placed on the number the board may select. Also, commanders may approve the entire list or disapprove it entirely, but they cannot approve some names and disapprove others, the new regs indicate.

The number of names on a unit's promotion list, the Army says, "will not exceed the number of position vacancies expected during the following 60 days except that new arrivals having promotion list standing

will be integrated without regard to length of the list."

The limitation on the number of men a single promotion board can recommend will be based on "existing or projected" vacancies for a two-month period, but lists may of course grow lengthy in time because of shortages of quota allocations from higher authority, integration of new men and other factors.

This possibility apparently is recognized by the Army because provisions are made to handle cases of men long-recommended but never promoted. Regs, to be distributed soon as a change to AR 600-200, will say that a soldier who has held recommended status for one year may request reevaluation at that time and each six months thereafter.

In a separate action last week, the Army extended for the indefinite future most of the "exceptional" promotion policies that went into effect last December. The policies authorize special hikes in Vietnam, in units alerted for deployment, in Army service schools and in the "skill development base."

One significant change provides that, with some exceptions, most graduates of MOS-producing courses will be promoted only to grade E-4. Previously, some could go to grade E-6.

A one-grade promotion is still possible for the MOS-course graduate: to grade E-5 for an E-4 who places in the top 50 percent of his class; or to grade E-6 for an E-5 who places in the top 20-percent of his class.

Similar rules also may apply to graduates of non-MOS producing courses at service schools.

Many other details of enlisted promotion procedure are spelled out for the first time as service-wide standards. Boards must be composed of a majority of officers and must include at least three but no more than seven voting members. Standard worksheets and reporting forms are to be used by all.

A man who is removed for cause from a recommended list and later acquitted of charges will, under the new rules, re-

gain his original order-of-merit position on the current list.

If a soldier missed his promotion while removed from the recommended list, he can be promoted immediately upon his reinstatement, regardless of current MOS restrictions, position vacancies, and quota allocations. His date of rank will be the date on which he otherwise would have been promoted.

A new feature of the revised promotion regulations will be DA "guidance" to selection boards, paralleling the generalized promotion policy guidance given to officer promotion selection boards. The statement emphasizes:

The intent of standardized scoring is to insure that all individuals are evaluated under the same Army-wide set of

standards. Standardized scoring is intended to provide equity and equal opportunity to the individual, particularly when he transfers from one command to another, and to help him concentrate on improvement in the right areas.

The fact that a soldier has been bypassed by a previous selection board shouldn't be considered a reason for another rejection.

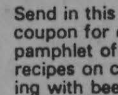

A specialist should be considered by the board with emphasis on his ability to handle his technical field and progress in it.

Board shouldn't give "undue" consideration to "unfavorable" comments of derogatory nature in a soldier's record if they were later followed by continuous outstanding performance of duty. (Army Times)

Learn the secrets of beer cookery

Find out how to make delicious everyday dishes with beer—such as beer meat loaf, beer chicken, beer sausages and beer cake. And then there are such gourmet treats as rarebits and Carbonnades Flamandes.

Beer cookery is as traditional as yesterday... as modern as tomorrow. Beer adds a real flavor treat.
